Donation Packet — Before You Donate

Thank you for considering a donation to Klamath Tech Collective's UpRiv | Upcycle program. This packet has everything your organization needs to review and complete before your donation — whether you're dropping equipment off, having a KTC volunteer pick it up, or mailing it in.

What's Included in This Packet

- How Donating Works — what we accept and the 4-step process, for your own reference
- Equipment Donation Agreement (Form 1.1) — transfers ownership to KTC; please read and sign
- Item Intake Checklist (Form 1.2) — list of the equipment you're donating
- Data Erasure Request (Form 1.3) — optional; only needed if you'd like KTC to securely wipe data-bearing devices for you

Getting Ready

- Gather the devices you'd like to donate and back up anything you want to keep
- If possible, remove or wipe your own data from devices — it speeds things up for our all-volunteer team. If that's not possible, plan to fill out the Data Erasure Request (Form 1.3) instead
- Have an authorized representative sign the Donation Agreement (Form 1.1) — in person at drop-off, when a KTC volunteer arrives for pickup, or by including the signed form in your shipment if mailing equipment in

Questions before you send or hand off your devices? Reach out any time.

Klamath Tech Collective — contact@klamathtech.diy

Donating Your Organization's Retired Tech

Keep it out of the landfill. Keep it in the community.

The Klamath Tech Collective's UpRiv | Upcycle program intercepts usable computers before they hit the landfill, refurbishes them, and gets them to people, families, and organizations across the Klamath bioregion at no or low cost. Donations from organizations like yours are one of our biggest sources of devices.

What We Accept

- Laptops and desktops manufactured 2012 or newer, working or not
- Servers and networking equipment
- Peripherals when donated alongside a working system (docks, cables, monitors)

Not currently accepted: CRT monitors, printers/toner, large appliances, or devices with a physical safety hazard (e.g., a swollen battery) that hasn't been disclosed in advance. When in doubt, just ask.

How It Works

1. Reach Out

Email contact@klamathtech.diy with a rough count and type of devices.

2. Schedule

We'll arrange whatever works for your organization: a pickup, a drop-off time, or mail-in instructions.

3. Sign & Itemize

A short Donation Agreement and Item Checklist take a few minutes to complete — on-site at drop-off or pickup, or included with a mailed shipment.

4. Get Your Paperwork

You'll receive a signed Acknowledgment of Donation, plus a Certificate of Erasure if you requested secure data wiping.

Your Data, Handled Right

Data erasure is optional and Donor's choice — request it and we'll take care of it. Devices are wiped with a multi-pass software erasure (ShredOS) following NIST SP 800-88 media sanitization guidance; drives that can't be wiped are physically destroyed or degaussed instead. Either way, you'll get a signed Certificate of Erasure matched to each device (serial number or description — whichever you have), listing exactly what was done and when. We respect your organization's data sovereignty: our volunteers do not review, access, or copy any data on your devices — our role is limited solely to performing the erasure you request.

A Note on Taxes

Klamath Tech Collective is an unincorporated community collective, not a registered 501(c)(3) nonprofit — so this isn't a charitable tax deduction. What it is: usable equipment diverted from the waste stream, a hand up for people who need a working computer, and support for closing the digital divide across the Klamath bioregion. We think that's worth doing regardless of the tax angle, but we want to be upfront about it from the start.

Equipment Donation Agreement & Release

This Agreement records the donation of used technology equipment to the Klamath Tech Collective ("KTC"), an unincorporated community collective that operates the UpRiv | Upcycle program. Please complete this form together with the attached Item Intake Checklist (Form 1.2) at the time of donation.

Donor Organization

Organization Name | Donation ID | Date

Mailing Address

Authorized Contact Name | Title

Email | Phone

Donated Equipment

This Agreement covers the equipment listed on the attached Item Intake Checklist (Form 1.2), which is incorporated into this Agreement by reference. Both parties should initial and keep a copy of the completed checklist with this Agreement.

Total Items Donated | Checklist Attached? Yes / No

Transfer of Ownership

By signing below, Donor irrevocably donates and transfers all right, title, and interest in the equipment listed on the attached checklist to KTC, free and clear of any liens or encumbrances. This transfer is a gift; no payment or other consideration is exchanged for the equipment.

Condition of Equipment — No Warranty

Donor provides the equipment “AS-IS, WHERE-IS,” with all faults, and without any warranty of any kind, express or implied, including without limitation warranties of merchantability, fitness for a particular purpose, or non-infringement. KTC makes no representation about the equipment's condition, functionality, or value.

Not a Tax-Deductible Contribution

Important — please read

Klamath Tech Collective is an unincorporated community collective and is not a registered 501(c)(3) tax-exempt organization. This donation does NOT qualify as a charitable contribution for federal or state income tax purposes, and KTC cannot issue a charitable-contribution tax receipt. Donor should consult its own tax advisor about any other potential treatment of this donation (for example, as a business asset disposal); determining and substantiating that treatment is Donor's responsibility.

Data on Storage Media

If possible, we encourage Donor to remove or wipe its own data from devices before donating — it's one less step for our all-volunteer team and gets equipment into circulation faster. If that isn't possible, KTC is glad to help. Select the option that applies to the data-bearing devices in this donation (e.g., laptops, desktops, and servers with internal storage):

☐ We have already removed or wiped our data from the data-bearing devices in this donation, or they contain no confidential, personal, or sensitive data. Donor assumes full responsibility for any data that may remain on the media.

☐ We would like KTC's help with secure data erasure for the data-bearing devices in this donation, and have completed the attached Data Erasure Request (Form 1.3).

If neither box is checked, KTC will treat data-bearing devices as requiring erasure before reuse or redistribution, and Donor remains responsible for any data present on media it did not disclose or request erasure for.

Data Sovereignty & Your Privacy

KTC respects Donor's data sovereignty. When Donor requests our data erasure service, our volunteers do not review, access, copy, or otherwise use any data stored on the devices provided — our role is limited solely to performing the erasure or destruction requested.

Release of Liability

To the fullest extent permitted by law, Donor releases and holds harmless KTC and its coordinators, volunteers, and members from any and all claims, damages, or liabilities arising out of or related to: (a) the condition of the donated equipment; (b) KTC's handling, refurbishment, redistribution, or disposal of the equipment; and (c) any data remaining on donated storage media where Donor did not request KTC's data erasure service under this Agreement. This release survives completion of the donation.

General

This Agreement is signed by an authorized coordinator on behalf of KTC, an unincorporated community collective, and does not create a partnership, joint venture, or agency relationship between Donor and KTC. This Agreement is governed by the laws of the State of California.

Complete only if requesting KTC's erasure service

Data Erasure Request

If possible, we encourage your organization to remove or wipe its own data from devices before donating — it's one less step for our all-volunteer team and gets your equipment into circulation faster. If that isn't possible, or you'd like KTC to handle it, complete this form and we'll take care of it. Once the work is done, you'll receive a signed Certificate of Erasure (Form 4.0) itemized by device, with the method used and completion date, so you can confirm every drive listed below was fully erased — referencing the Donation ID below.

Data Sovereignty & Your Privacy

KTC respects your organization's data sovereignty. Our volunteers do not review, access, copy, or otherwise use any data stored on the devices you provide for this erasure service — our role is limited solely to performing the erasure or destruction method selected below.

Donor Organization

Donation ID

Date

Serial or asset tag numbers let us match this request to the exact devices with precision, and we prefer them when you have them handy. If you don't — no problem. A short name or description ("gray Dell laptop, cracked screen", "Laptop #1 of 3") works fine in that column instead; just fill in whichever you have for each device below.

Device Name / Description	Serial / Asset Tag (optional)	Functional? (Y/N)

More than 6 devices? Attach an extra sheet listing the rest the same way.

Requested method:

- ☐ Standard software wipe — multi-pass erasure via ShredOS (NIST SP 800-88 "Purge")
- ☐ Physical destruction / degaussing — for drives that are non-functional or cannot be wiped
- ☐ No preference — KTC will select the appropriate method for each device

I am authorized to request data erasure for the devices listed above on behalf of Donor.
